1. INTRODUCTION

1.1 Purpose of Website

The ShopEase Electronics website is designed to provide customers with a convenient and secure online platform for purchasing electronic products. It aims to simplify the shopping process by allowing users to browse, compare, and order products from various categories without the need to visit physical stores. Online shopping is increasingly recognized for its convenience because it offers significant time efficiency and flexibility compared to traditional physical shopping (Cao & Mokhtarian, 2005; Grewal et al., 2024).

The website also offers features such as detailed product descriptions, customer reviews, secure payment options, and fast delivery services to increase user confidence and satisfaction. Research shows that trust and transaction security are among the most critical factors affecting consumers' willingness to shop online (Rahman et al., 2021; Huang & Benyoucef, 2024).

With its user-friendly interface and responsive design, ShopEase Electronics strives to make online purchasing effortless and accessible for customers of all ages and technical backgrounds. Studies highlight that responsive web design and usability strongly influence customer satisfaction and intention to reuse an e-commerce platform (Kim & Lee, 2023; Nielsen Norman Group, 2024).

1.2 Goal of the Website

The primary objectives of the ShopEase Electronics website are to expand its online presence, boost sales, and build a strong, trustworthy relationship with customers through a seamless digital shopping experience. The website aims to reach a wider audience by offering a convenient, accessible, and efficient platform where customers can shop for a variety of electronic products anytime and anywhere. With an intuitive and user-friendly interface,

ShopEase Electronics ensures that users can easily browse, search, and purchase products with minimal effort.

It provides comprehensive product information, including detailed descriptions, specifications, customer reviews, and comparison tools, to help customers make informed decisions. Secure online payment options and reliable data protection measures are implemented to ensure the safety and privacy of every transaction. Through these efforts, ShopEase Electronics strives to establish strong brand credibility, encourage repeat purchases, and build long-term customer loyalty in the competitive online marketplace.

1.3 Intended Audience

The intended audience of ShopEase Electronics consists primarily of tech-savvy young adults, students, working professionals, and households who value quality, affordability, and convenience when purchasing electronic products online. The website is designed for individuals who actively use digital platforms and are comfortable browsing, comparing, and purchasing products through e-commerce systems.

ShopEase Electronics targets students who require affordable laptops, tablets, and accessories to support their academic needs, as well as working professionals who seek reliable, high-performance devices such as laptops, smartphones, and office electronics for productivity and daily use. In addition, the platform caters to households and families looking for practical and cost-effective home electronics and appliances to enhance everyday living.

The website also appeals to technology enthusiasts who are interested in the latest gadgets, innovations, and trusted electronic brands. Overall, ShopEase Electronics is tailored for users who prioritize efficiency and convenience, allowing them to shop anytime and anywhere without the need to visit physical stores.

1.4 Opportunity/ Problems/ Issues

ShopEase Electronics has several opportunities and challenges in the rapidly evolving digital marketplace. One major opportunity lies in the growing trend of e-commerce and digital shopping (Statista, 2025), as more consumers prefer to purchase products online for convenience and accessibility. This trend allows the company to expand its reach beyond local markets and

attract global customers through its online presence. By leveraging digital marketing strategies and offering a diverse range of products, ShopEase Electronics can strengthen its brand visibility and competitiveness.

However, the platform also faces certain challenges that must be addressed to ensure sustainable growth. Security concerns regarding online payments remain a critical issue, as customers need assurance that their personal and financial information is protected during transactions (Rahman et al., 2021). Additionally, managing logistics and ensuring timely delivery of products can be complex, especially when catering to customers from different regions.

1.5 Type of Content

The ShopEase Electronics website incorporates a comprehensive set of features designed to provide an informative, secure, and user-friendly shopping experience. The primary components are as follows:

- 1) **Detailed Product Information** This section includes comprehensive product listings and specifications, allowing users to browse by category. It provides clear details on item features, pricing, and technical data to support purchase decisions.
- 2) **Customer Reviews and Ratings** This area features genuine feedback from previous buyers, which assists customers in making informed decisions based on the experiences of others.
- 3) **Promotions and Advertisements** The website utilizes strategically placed promotional banners to highlight special offers, discounts, and new product arrivals, keeping customers informed of current deals.
- 4) **Customer Support Resources** This component includes a dedicated customer support section and a comprehensive FAQ (Frequently Asked Questions) page. It offers assistance with user inquiries, troubleshooting, and general guidance.
- 5) **Account and Transaction Management** This feature provides secure pages for user account management, allowing users to manage personal profiles. It also enables easy order tracking, history review, and facilitates secure and simple purchase completion.

- 6) In addition to textual and functional content, the ShopEase Electronics website incorporates the following graphic elements to enhance visual presentation and usability:
- a) High-quality product images and image sliders to clearly display electronic products
 - b) Category and product icons to support intuitive navigation
 - c) Star rating icons and review cards to visually represent customer feedback
 - d) Promotional banners and discount indicators to highlight special offers and new arrivals
 - e) Clearly designed call-to-action buttons to encourage user interaction
 - f) A consistent color scheme and readable typography to maintain visual consistency
 - g) Grid-based layout structure to organize content effectively
 - h) Form icons, step indicators, and confirmation or alert symbols to guide users during account management and transaction processes

1.6 Related Websites

Some websites related / inspired to make **ShopEase Electronics** include:

1.6.1 Amazon

Figure 1. Home page of ([Amazon.com](https://www.amazon.com))

Amazon (<https://www.amazon.com>) serves as a primary inspiration for ShopEase, as both platforms are built on the same foundational e-commerce model. They share identical core features, relying on a content structure that includes detailed product listings, essential customer reviews, promotional banners, and secure user account management. Both websites prioritize a user-friendly interface and personalization, aiming to create a tailored shopping experience by using recommendations based on user history to make browsing effortless and drive sales. Furthermore, because they target a broad consumer audience, both Amazon and ShopEase face common operational hurdles, specifically the challenges of ensuring high-level security for customer data and payments, as well as managing the complex logistics required for timely product delivery

1.6.2 Shopee

Figure 2. Home page of (shopee.com.my)

Shopee (<https://shopee.com.my>) influences ShopEase through its identical core e-commerce features, which include detailed product listings, a heavy reliance on customer reviews and ratings to build trust, and prominent promotional banners or sales such as flash sales. ShopEase aligns with Shopee's "shoppertainment" model by focusing on a "sticky" user experience that is effortless and enjoyable, aiming to retain users through highly engaging and convenient interactions. Additionally, since both platforms target a wide audience that values convenience and affordability, they share the exact same core operational challenges: ensuring robust security for online payments and managing complex logistics to guarantee timely delivery.

1.6.3 Tokopedia

Figure 3. Home page of (www.tokopedia.com)

Tokopedia (<https://www.tokopedia.com>) provides a model for ShopEase with an identical platform and content structure, functioning as a comprehensive marketplace (C2C and B2C) built on detailed product listings, strong seller support, and on-site advertising. ShopEase directly mirrors Tokopedia's core "Focus on Consumer" philosophy, using data for personalization to create a simple, secure, and tailored user experience that fosters customer loyalty. Both platforms target a broad demographic and must overcome mirrored operational challenges, which include ensuring high-level security for online payments and customer data, and managing the immense complexity of a reliable and timely logistics network.

1.7 Comparison of Related Websites

The comparison table presents an analysis of websites that are related to and have inspired the development of ShopEase Electronics, namely Amazon, Shopee, and Tokopedia. These platforms were selected due to their strong presence in the e-commerce industry and their effective implementation of user-centered design, product presentation, and transaction management features.

The table compares key aspects such as platform type, product focus, product listings, customer reviews, promotional strategies, user experience, target audience, security features, and logistical challenges. By examining the similarities and differences among these established platforms, the comparison highlights best practices that can be adapted and integrated into ShopEase Electronics. This analysis helps justify design decisions and ensures that ShopEase Electronics delivers a competitive, secure, and user-friendly online shopping experience tailored to its intended audience.

Table 1. Comparison of Related Websites Table

Criteria	Amazon	Shopee	Tokopedia	ShopEase Electronics
Type of Platform	Global e-commerce marketplace (B2C & C2C)	Regional e-commerce marketplace (B2C & C2C)	Marketplace platform (B2C & C2C)	Online electronics store
Main Product Focus	Wide range of products including electronics	Wide range of products with strong electronics segment	Wide range of products including electronics	Electronics and gadgets only

Product Listings	Detailed product descriptions and specifications	Detailed listings with seller variations	Detailed listings with strong seller support	Detailed electronics-focused product listings
Customer Reviews & Ratings	Strong emphasis on verified customer reviews	Heavy reliance on reviews and ratings to build trust	Customer reviews to support purchasing decisions	Customer reviews and ratings for informed decisions
Promotions & Sales	Frequent deals, discounts, and promotional banners	Flash sales, vouchers, and promotional campaigns	On-site advertising and promotional features	Promotional banners and special offers
User Experience Focus	Personalized recommendations and easy navigation	“Shoppertainment” and engaging user experience	Consumer-focused and personalized experience	Simple, user-friendly, and efficient shopping experience
Target Audience	Global consumers	Price-conscious and convenience-focused users	Broad demographic consumers	Tech-savvy users, students, professionals

Security & Payment	Secure payment and strong data protection	Secure online payment system	Secure payment and data protection	Secure transactions and account management
Logistics Challenges	Complex global delivery and logistics	Managing large-scale regional logistics	Managing large-scale logistics network	Ensuring timely delivery and logistics efficiency

2. WEB DESIGN

2.1 Page Titles

2.1.1 Home Page

The Home page serves as the main landing area of ShopEase. It introduces users to the store's purpose and showcases featured electronics, promotions, and new arrivals. This page provides quick access to major sections such as Shop, Cart, Product Details, and Contact. It also highlights popular categories to help customers begin their shopping journey easily.

2.1.2 Shop Page

The Shop page displays the full range of electronic products available on the website. Here, users can browse items such as smartphones, laptops, accessories, and more. Each product includes clear descriptions, prices, images, and specifications. Filtering and sorting options help customers find the exact item they want efficiently.

2.1.3 Product Details Page

The Product Details page gives users a deeper look into a selected electronic item. It provides key information such as product specifications, technical details, features, customer reviews, and high-quality images. This page helps customers make informed decisions by presenting all necessary details clearly and attractively.

2.1.4 Cart Page

The Cart page lists all items the user has chosen to purchase. It allows customers to review product quantities, update or remove items, view total pricing, and prepare for checkout. This page ensures the user has full control over their order before proceeding to payment.

2.1.5 Checkout Page

The Checkout page serves as the final step in completing a purchase. It collects essential customer information such as shipping address, contact details, and payment method. The page is designed to be secure and simple to ensure a smooth and confident transaction process.

2.1.6 Contact Page

The Contact page provides users a way to reach ShopEase's customer support team. It includes a contact form for inquiries, store communication details, and links to support resources. This page ensures that users can get assistance quickly whenever they face issues or need guidance.

2.3 Site Map

Figure 4. ShopEase Site Map

The site map illustrates the overall structure of the ShopEase website, beginning with the Home page at the top of the hierarchy. From this main entry point, users can easily navigate to the core sections of the site, including Shop, Cart, Checkout, and Contact. Each of these pages serves a specific purpose in guiding users through their shopping experience. For example, the Cart and Checkout pages support the purchasing process, while the Contact page provides users with customer assistance when needed.

The Shop page also contains a subpage called Product Details, which provides in-depth information about individual electronic items. This hierarchical relationship shows that users must first browse the Shop page before viewing details about a specific product. Overall, the site map demonstrates a simple, clear, and user-friendly navigation flow where all essential pages branch logically from the Home page. This structure ensures that visitors can move smoothly through the website and find the information or products they need with ease.

2.4 Wireframe

2.4.1 Wireframe of the homepage

Figure 5. Wireframe layout of Homepage

This Homepage wireframe includes a header with the logo, search bar, and navigation links, followed by a large promotional banner with featured deals. Below that, there are quick service highlights like free shipping and secure payment. The main area displays featured products, service boxes, and a product grid with best sellers. Finally, the layout ends with a simple footer for links and contact details, creating a clear and easy shopping experience.

2.4.2 Wireframe of the Shop page

Figure 6. Wireframe layout of Shop

The Shop wireframe represents a header with navigation links, search bar, and contact icons. Below that, there's a page title with breadcrumb navigation and a large promo banner. The left sidebar includes product categories, price filter, more categories, and featured products, along with a promo box and button link. The main section displays a grid of products with images, names, and prices, followed by pagination or a load more button. A simple footer sits at the bottom for additional links or information.

2.4.3 Wireframe of the Cart Page

Figure 7. Wireframe layout of Cart

The Cart wireframe represents layout. It includes a header with navigation links, search bar, and contact icons. Below that, there's a page title with breadcrumb navigation. The main section displays an items list showing the products in the cart, a promo code input with a submit button, and a cart detail box on the right summarizing the total price with a checkout button. At the bottom, there's a simple footer for additional links or information.

2.4.4 Wireframe of the Checkout page

The wireframe illustrates the layout of a checkout page. At the top, a header bar contains a navigation icon, a search bar, and three circular icons with a plus sign, followed by the text 'balance'. Below the header is a horizontal bar with five 'Link' labels and a 'Phone Number' label with a telephone icon. The main content area is divided into two columns. The left column features a 'Page Name' section with a breadcrumb 'bread / crumb / link'. Below this is a large form section with multiple 'Name' labels and 'Value' input fields, followed by two 'Checkbox' labels and a 'Name' label with a 'Value' input field. The right column contains an 'Item List' section with five 'Item details' labels and expand/collapse icons. Below this is a 'Shipping Options' section with three 'Checkbox' labels. A 'Subtotal: XXXXXXXX' label is positioned to the right of the shipping options. A 'Proceed to Payment' button is located at the bottom of the right column. The footer section at the bottom of the page is labeled 'Footer'.

Figure 8. Wireframe layout of Checkout

The CheckOut wireframe shows a layout page featuring a header with navigation and icons, breadcrumb navigation, a form section for user input, an item list with shipping options and subtotal, and a footer designed to guide users through reviewing their order and proceeding to payment.

2.4.5 Wireframe of the Product Details page

Figure 9. Wireframe layout of Product Details

The Product Details wireframe shows a layout with a top header that includes a logo, search bar, navigation links, and contact info. Below that is breadcrumb navigation to show the page location. The main section is a message form area with boxes for input and a large space for a message or image. There are also plus icons to add more content. At the bottom, there's a footer for extra information.

2.4.6 Wireframe of the Contact page

Figure 10. Wireframe layout of the Contact

The Contact wireframe shows a layout of a top header that includes a logo, search bar, navigation links, balance info, and a phone number. Below that is breadcrumb navigation under a page title. The main section is a message form area with several boxes for input and a large space for a message or image. There are also plus icons to add more content. At the bottom, there's a footer.

3. USER INTERFACE DESIGN

3.1 Home Page Interface

(a)

(b)

Figure 11. Home Page Interface

The **ShopEase Home Page interface** is designed as a modern and user-friendly e-commerce landing page that allows users to browse and shop for electronics easily. It features a header section with the ShopEase logo, a central search bar, navigation links (Home, Shop, Cart, Checkout, Product Details, Contact, etc.), and icons for user account, wishlist, and cart, along with a customer support phone button. The main hero banner highlights promotional offers such

as discounts on selected laptops, desktops, or smartphones, supported by a “Shop Now” call-to-action button and a special offer display for featured products. Below the banner, service highlights are shown using icons for free return, free shipping, 24/7 support, gift cards, secure payment, and online service to build customer trust. The page also includes product display sections such as “Our Products,” “All Product Items,” and “Bestseller Products,” which present items in a clean grid layout with product images, names, categories, pricing, and sale/new labels, while filter tabs like All Products, New Arrivals, Featured, and Top Selling improve browsing convenience. Lastly, the footer provides store information, contact details, and quick navigation links for customer service and policies, completing a structured layout that enhances user experience and encourages shopping engagement.

Figure 12. Shop Page Interface

The ShopEase Shop Page interface is designed to help users browse products efficiently with structured filtering and clear product listings. At the top, it includes the same consistent header with the ShopEase logo, search bar, navigation menu (Home, Shop, Cart, Checkout, Product Details, Contact), and icons for account, wishlist, and cart, ensuring smooth navigation across the website. Below the header, a page banner displays the title “Shop Page” with breadcrumb navigation (Home > Pages > Shop), followed by a service highlight row showing features such as free return, free shipping, 24/7 support, gift cards, secure payment, and online service. The main content area is divided into two sections: a left sidebar and a product display section. The sidebar provides category filters, price range selection, color selection, additional product options, featured products, and product tags, allowing users to refine their search easily. The main product section includes promotional offer banners, a keyword search bar, sorting dropdown (Default Sorting), and grid/list view icons for layout switching. Products are displayed in a clean grid format with images, labels (New/Sale), category name, product title/code, and discounted price, along with pagination controls at the bottom for browsing multiple pages. The page ends with promotional banners and a detailed footer containing company info, quick links, customer service, and policy sections, creating a complete and user-friendly shopping experience.

3.3 Cart Page Interface

Figure 13. Cart Page Interface

The ShopEase Cart Page interface is designed to provide users with a clear and organized view of the items they have added to their shopping cart before proceeding to checkout. At the top, the page maintains a consistent layout with the ShopEase logo, search bar, navigation menu (Home, Shop, Cart, Checkout, Product Details, Contact), and icons for wishlist, account, and cart, ensuring easy access to other sections of the website. A banner section displays the page title “Cart Page” along with breadcrumb navigation (Home > Pages > Cart Page), helping users understand their current location. The main content area contains a structured cart table with columns such as product name, model, price, quantity, total, and a remove/delete button, allowing users to adjust item quantities using plus/minus controls or remove items entirely. Below the table, there is a coupon input field with an “Apply Coupon” button for discount codes, while on the right side a Cart Total summary box calculates the subtotal, shipping fee, and final total amount. A prominent “Proceed Checkout” button is provided to guide users to the next step in completing their purchase. The page ends with the standard footer section containing company information, quick links, customer service links, and policy information, ensuring users can access support or additional details easily.

Figure 14. Checkout Page Interface

The **ShopEase Checkout Page interface** is designed to guide users through completing their purchase by collecting billing information and confirming order details in a structured layout. At the top, the page includes the consistent ShopEase header with the logo, search bar, navigation menu (Home, Shop, Cart, Checkout, Product Details, Contact), and shopping icons, along with a banner displaying the title “**Checkout Page**” and breadcrumb navigation (Home > Pages > Checkout). Below the banner, a row of service highlights such as free return, free shipping, 24/7 support, gift card offers, secure payment, and online service is shown to reassure customers. The main section is divided into two parts: on the left, a **Billing Details** form requests user information including first name, last name, company name, address, city, country, postcode, mobile number, email address, and optional order notes, with options to create an account or ship to a different address. On the right, an **Order Summary** table lists the selected items with their model, price, quantity, and totals, followed by a subtotal and selectable shipping methods. The checkout page also provides multiple payment options such as direct bank transfer, check payments, cash on delivery, and PayPal, giving users flexibility in choosing how to pay. A large “**Place Order**” button is displayed at the bottom to finalize the transaction, and the page ends with the standard footer containing company information, quick links, customer service, and policy sections for easy access to support and additional details.

Figure 15. Product Detail Page Interface

The ShopEase Single Product Page interface is designed to provide detailed information about a specific product and support purchasing decisions in a clear and organized layout. At the top, it maintains the consistent ShopEase header with the logo, search bar, navigation menu (Home, Shop, Cart, Checkout, Product Details, Contact), and shopping icons, followed by a banner showing the page title “Single Product” with breadcrumb navigation (Home > Pages > Single Product). The main content section is divided into two areas: a left sidebar and the product detail area. The sidebar includes a keyword search box, product categories list, color selection filters, featured products, promotional banner, and product tags to help users explore other items easily. The center of the page displays a large product image with thumbnail previews underneath for viewing related product images, while the right side shows product information such as product name, category, price, rating stars, SKU, stock availability, description text, and social share buttons. Users can adjust the quantity using plus/minus controls and click the “Add to cart” button to purchase the product. Below, the interface includes tabs for Description and Reviews, as well as a Leave a Reply section where customers can submit reviews, ratings, and comments. At the bottom, a Related Products section shows similar items in a horizontal product carousel, encouraging additional browsing and purchases, and the page ends with the standard footer containing company information, quick links, customer service, and policy sections for easy access to support and navigation.

3.6 Contact Us Page Interface

Figure 16. Contact Us Page Interface

The ShopEase Contact Us Page interface is designed to allow users to easily communicate with the store and access important contact information. At the top, it follows the same consistent layout with the ShopEase logo, search bar, navigation menu (Home, Shop, Cart, Checkout, Product Details, Contact), and shopping icons, followed by a banner showing the page title “Contact Us” with breadcrumb navigation (Home > Pages > Contact). The main section begins with a short introduction encouraging users to get in touch, and it features a large contact form on the left where users can enter their name, email, phone number, project, subject, and message, then submit it using the “Send Message” button. On the right side, an embedded Google Map is displayed to show the store location (UMT area), helping users find the business easily. Below the form and map, the page provides a set of contact information blocks that include the physical address, email contact, telephone number, and portfolio/website link, presented with clear icons for quick identification. The page ends with the standard footer containing company details, quick links, customer service links, and information/policy sections, ensuring users can navigate to other pages or access support resources easily.

4. CONCLUSION

In conclusion, the development of the ShopEase Electronics website is intended to offer a convenient, secure, and user-friendly online shopping platform that focuses specifically on electronics and gadgets. The website is structured to help users browse products smoothly, compare items easily, and complete purchases efficiently through an organized layout and clear navigation. This matches the main purpose of the project, which is to improve convenience and accessibility while also building customer trust through secure payment methods and reliable services.

ShopEase is also designed to cater to a wide range of users such as students, working professionals, and households who value affordability, efficiency, and ease of use when buying electronics online. Features like product listings, customer reviews, promotions, account management, and customer support are planned to support smarter purchasing decisions and improve the overall shopping experience.

The design approach was strengthened through comparisons with major platforms such as Amazon, Shopee, and Tokopedia, as these sites provided useful insights into effective e-commerce practices that can be adapted for ShopEase. In addition, the site map and wireframes show a clear and consistent structure, helping ensure a smooth user flow from browsing products all the way to checkout.

Overall, this project provides a strong starting point for developing a competitive electronics-focused online store. With continued development and improvements, ShopEase has the potential to grow into a reliable and trustworthy platform for electronics shopping in today's digital marketplace.
